# Wireframing in Figma

This file showcases examples on how you could easily build wireframes in Figma. For more tutorial content and features overview, visit **help.figma.com**.

## Overview

This file contains common modular layouts that could be used to assemble web page wireframes. Choose from various navigation, hero, and body content modules.

**Get started using this file**

1. Create a new 1440px wide frame which will serve as the container for your wireframe.
2. Duplicate a frame you want to use from the assessment to the right. A sample wireframe is included.
3. Create custom modules using Components already included in this file by going to the **Assets** panel in the top left.
